Acoustic enclosure

Acoustic Enclosure For Blowers Features

Construction – SGSPMPL Acoustic enclosure is made out of cold rolled steel of best quality available in India Of **TATA STEEL OR ESSAR STEEL** . After fabrication sheet metal parts go thru eight tank treatment and finally powder coated for long lasting finish. Acoustic enclosure is of modular construction with the provision to assemble and dismantle easily as per site condition.

Insulation

High Density fire retardant and noise reduction type Acoustic Foam or Resin Bonded Rockwool / Mineral wool / Acoustic profile foam of suitable density properly covered with Fiber cloth / tissue and perforated sheet is properly riveted on all doors, roof and sides of the enclosure to absorb noise.

Ventilation System

A suitably designed Draught Ventilation System is incorporated & wherever necessary axial blower is provided.

Performance Parameters

The average sound level when measured in green field (ISO 8528 Part 10) at 1 meter distance from all four sides is less than 75db (A) average, **as per CPCB norms.**

The average stabilized hot air temperature rise within the canopy near suction air filter is maintained within 7°C over and above ambient temperature.

Hardware- locks & hinges used are of stainless steel, Door rubber is of fine EPDM quality.

Viewing window

A glass window is provided for easy viewing of the application parameters

optional

Additional features.

SGSPMPL enclosure have unique option for automation of openable portion i.e. doors, windows, cutout on hydraulic & pneumatic operation. option for fitting electronically operated locks, biometric locks, sound scanning devices or along with process & temperature recording systems uniquely
Built in a standard computer systems.
